

## 602020

*a diversified hard asset program*

Now that you have decided to diversify your personal portfolio with hard assets wouldn't it make sense to diversify your hard assets?

### 60

GOLD – The eternal standard of wealth. It is the oldest metal and over the years has symbolized wealth and guaranteed power. The core of your precious metals investment used to hedge against inflation and the declining value of the U.S. dollar.

### 20

SILVER - It is estimated that more than 95% of all silver ever mined throughout history has been used and is gone forever. Currently the ratio to Gold is over 60 to 1 historically very high and some say undervalued. In the earliest Egyptian records, Silver was considered more precious than Gold.

### 20

PLATINUM – It is the rarest and heaviest of the precious metals. All of the Platinum ever mined would fit in the average size living room. It takes 10 tons of ore to generate one ounce of Platinum. Annually, only about 133 tons of Platinum is mined.

Precious metals markets are highly volatile and have wide swings on a daily basis and should be considered a high risk investment.

As the ultimate long-term store of value, precious metals may very well be the ultimate retirement asset. Unlike other investments, precious metal does not rely on the performance of another individual or institution for value.

IRA Eligible – For several years only Gold and Silver U.S. American Eagle coins were allowed as IRA investments under the federal guidelines. However, legislation which took effect in 1998 expanded this to include Gold, Silver, Platinum, and Palladium bullion which meets certain fineness standards. Ask for a self – directed IRA application kit today.

Permissible precious metals for your IRA

#### Gold

- American Eagle coins
- Australian Kangaroo/Nugget coins
